

A little less paperwork.

Welcome to your local document workspace.

This two-page PDF contains selectable text.

Folio reads its text layer without running an OCR model.

Try correcting this sentence, then save your changes.

Your CSV export will contain one row for each page.

Make the text your own.

1. Compare the original page with the extracted text.
2. Make a correction and select Save changes.
3. Download the document as a CSV file.

Punctuation stays intact: commas, quotes, and line breaks.

Example: "Review complete, ready to export."
